OVERVIEW

- Our project is about a web-based pizza ordering system.
- Pizza can be order in more convenient way.
- Payment can be easily done using various online mode or cash on delivery (COD).
- It makes system very effective for ordering a pizza.
- Admin can view sales report which can be helpful for decision making.
- Easy add/update/delete process of pizza.

Project scope

*Customer login page

- login failed
- login successfully

*Home page

*Order page

- order submit page
- order cancel page

Conclusion

Implementation of proposed software will result in an efficient ,error free ordering system for the shop.
